

Thank you! for ordering my Holiday Gift Tags.

Here are some instructions, tips and recommendations to print, cut and assemble the perfect gift tag for your beautiful present.

LIST OF MATERIALS

- PDF reader or Adobe Acrobat (a free download at adobe.com).
- Printer.
- 8½" x 11" premium-quality photo paper or heavy bright white paper (cardstock).
I recommend using premium-quality photo paper (semi-gloss) for professional looking results.
- Scissors or paper cutter.
- Hole punch.
- Ribbon.

PRINTING

- For best results, set the paper type in your printer drive, if the paper is not listed, choose the best quality printing option.
- Select "none" or "do not scale" under the page scaling option unless you specifically want to print out the tags smaller.
- Select the "borderless printing" option (if available) under the page settings dialog box.

ASSEMBLY

- Print the sheet on 8.5x11 photo paper.
- Cut along the design or following the trim marks.
- Use a small hole punch to perforate a hole on top of the tag.
- Insert ribbon through the hole and tie it around the gift.

CONTACT ME

Please contact me at blugrassdesigns@gmail.com if you have any questions or problems using these files I'll be more than happy to help you.

Visit my shop www.blugrassdesigns.com for more party packs!

Thanks,
Paula
